EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

This application is in condition for allowance except for the presence of claims 1, 4-6 and 9-20 directed to non-elected with traverse. Examiner is authorized to cancel these claims by Attorney Siller on 3/11/2009. Accordingly, claims 1, 4-6 and 9-20 are canceled.

Allowable Subject Matter

Claims 21-24 and 26-30 are allowed.

Reasons for Allowance

Claims 21-24 and 26-30 are allowed since there is no prior art of record that teaches or suggests a reflector attached to an outer surface of a glass substrate and a method of forming thereof comprising a relationship of various elements as claimed with the specific allowable subject matter cited in the following claim:

Claims 21 and 22:

- a reflective film
- a processed resin layer having a plurality of recesses, which define a reflection characteristic of the reflective film
- a moisture-proof film base that supports the processed resin layer

Art Unit: 2871

- a support resin layer having a high glass transition temperature interposed between the processed resin layer and the moisture-proof film base
- wherein the support resin layer having a higher glass transition temperature and lower moisture absorption property than those of the processed resin layer
- wherein the reflective film is disposed between the adhesive film and brought into direct contact with the processed resin layer such that a shape of the plurality of recesses of the processed resin layer is reflected in the reflective film and wherein the adhesive film and the glass substrate, in that order, are laminated upon the reflective film, wherein the recesses are formed in a spherical shape for reflection and randomly arranged, and contact portions between the recesses are formed in a peaked shape

Claims 23, 27, 29 and 30 are allowed since they depend on allowed claim 21.

Claims 24, 26 and 28 are allowed since they depend on allowed claim 22.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yoshii et al (US 2002/0030774) disclose a reflector attached to an outer surface of a glass substrate comprising a reflective film; a processed resin layer having a plurality of recesses, which define a reflection characteristic of the reflective film; a moisture-proof film base that supports the processed resin layer. However, Yoshii et al lack disclosure of a support resin layer having a high glass transition temperature interposed between the processed resin layer and the

Art Unit: 2871

moisture-proof film base; wherein the support resin layer having a higher glass transition temperature and lower moisture absorption property than those of the processed resin layer.

Akins et al (US 6285425) disclose a ridged reflector attached to an outer surface of a glass substrate comprises a polymeric layer having a ridged surface and an opposite surface opposite the ridged surface. The ridged surface includes a series of ridges. Each of said ridges has a first face and a second face intersecting the first face. The first face is oriented at a first angle relative to a plane parallel to the opposite surface. A reflective metallic layer overlies at least the first faces of the polymeric layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
